Tracker Corp Partners with OpSource for Maximum Data Center Reliability, Security and Disaster Recovery

SAN FRANCISCO, CA – May 20, 2010 [Tracker Corp](#)™ today announced it has partnered with [OpSource](#)™ for data center hosting of Tracker Corp's innovative SaaS solutions that simplify and automate Form I-9 processing and E-Verify™ compliance.

As Tracker Corp's data center, OpSource performs multiple layers of application and security monitoring, 24x7x365. Tracker is the only leading vendor that undergoes 30,000-point system scans daily. With fully-meshed, Tier 1 IP connectivity to multiple backbone providers, OpSource guarantees high speed and reliability of Tracker Corp's hosted services.

OpSource provides Tracker Corp with the added security of data encryption at all times—in transit and at rest—using high-assurance, class 3 SSL certificate RSA key length of 1024 bits and the strongest 256 bit encryption available. OpSource's "always on" technology includes multiple integrated data centers on both coasts and nightly transfers of encrypted backups via secure VPN--ensuring product uptime and availability even in the face of natural disasters.

Unlike other immigration and i9 compliance software vendors that co-mingle data from multiple customers, Tracker Corp uses OpSource to provide a single database per company (single tenant architecture) that puts a physical wall around each client's database, maximizing data security and privacy of employees' personal identification information.

"In addition to assuring we continue our perfect 10-year history of data security, choosing OpSource as our data center provides Tracker Corp with the robust flexibility our cutting-edge software services demand," says Brett Weiss, Chief Operating Officer at Tracker Corp. "This relationship will provide our clients with the utmost peace of mind, thanks to OpSource's unparalleled business continuity, database security and 100%-uptime reliability."

Tracker Corp provides software for immigration management, I-9 compliance and E-Verify. Used by approximately 75% of top-rated immigration law firms and many Fortune 1000 companies, hospitals and universities, Tracker Corp products include [Tracker Immigration](#)™ immigration management software and [Tracker I-9](#) compliance software. Founded in 1998, Tracker Corp is privately held and based in San Francisco, CA. For more information, visit <http://www.trackercorp.com>.

OpSource delivers Software-as-a-Service (SaaS) and Web applications for on-demand companies, with hundreds of applications, millions of users and billions of transactions supported daily. SAS 70 Type II compliance certified, OpSource is also the data center used and trusted by Google, Yahoo and Adobe Systems. Headquartered in Santa Clara, CA, OpSource has Web application delivery centers in Virginia and London. To learn more, visit <http://opSource.net>.
