

Tracker Corp Releases Latest Update to ImmigrationTracker Classic Software

SAN FRANCISCO, CA – July 26, 2011 Tracker Corp, <http://trackercorp.com>, innovative developer of the [immigration case software](#) used by more Fortune 500 employers than any other immigration management system (IMS), and the most automated [I-9 form and E-Verify compliance software](#), announced the latest release of its ImmigrationTracker Classic (Version 6.2.48) software.

Enhancements to the popular enterprise-based immigration software entail perfected integration with Microsoft Office 2010 and more user-friendly configurations to Web Portal questionnaires, intakes and reports (including disposition types). ImmigrationTracker Classic also features a new Visa Bulletin Report that automatically compares the current information on the Department of State's Visa Bulletin website with the preference category and priority date of individuals stored in Tracker, automatically generating a list of those who are current.

Other functionality improvements make users' workflow processes even more intuitive. The addition of "Approval Valid To" date and "LPR Process Started" fields on the PERM screen enable valuable new alerts for custom, on-the-fly reports. Even simple details, like alphabetization of company contact names for each case and name hyphenation support for compound names, boost Tracker's convenience and efficiency.

"These enhancements to our Classic IMS software illustrate Tracker's attention to detail and complete understanding of the real-world handling of immigration cases," said Brett Weiss, Tracker Corp CEO. "Tracker is the IMS leader not just because we possess the immigration know-how to do it, but because we know how to do it better."

Tracker Corp provides software for immigration management, I-9 compliance and E-Verify. Used by more than 75% of the top immigration law firms who buy case management software (according to *IndUS Business Journal* and American Lawyer Media), as well as many Fortune 1000 companies, hospitals and universities, Tracker Corp products include [ImmigrationTracker™](#) software and [Tracker I-9](#) compliance software. Founded in 1998, Tracker Corp is privately held and based in San Francisco, CA. For more information, visit <http://www.trackercorp.com>.
